FOREWORD

Alberta Health is pleased to present **Hospital Care in Alberta** for the fiscal year ended March 31, 1989. This publication, a statistical supplement to the Annual Report of the Department, details financial information and patient care services provided by hospitals and nursing homes in the province.

We welcome your suggestions or inquiries pertaining to **Hospital Care in Alberta**. Your comments or requests for additional information may be directed to:

GLOSSARY 69

General Hospitals

- On March 31, 1989, 129 public and federal general hospitals provided patient services for Alberta residents.
- The total number of acute and auxiliary beds for adults and children in general hospitals increased by 1.6% to 13,316 beds from 13,110 in the previous year. This provided a ratio of 5.5 beds per 1,000 Albertans, unchanged from the previous fiscal year.
- The average percent occupancy of all general hospitals was 68.2% in 1988-89, compared to 65.9% in 1987-88, with observed differences between hospital groups.
- There were 161.2 adult and children separations per 1,000 population in 1988-89, a decrease of 2.3% since 1987-88.
- In general hospitals, the average length of stay of adult and children in-patients was 8.4 days, up 3.7% from the previous period.
- Adult and children patient-days per 1,000 population increased 4.3% to 1,390.3 patient-days.
- The average daily number of adults and children in hospital was 9,149.3, an increase of 6.0% from 1987-88.
- The number of full-time equivalent employees in general hospitals (excluding medical staff, interns, residents) increased 7.7% to 32,698.2 in 1988-89.
- Paid hours per patient-day increased to 20.0 from 19.5 in the preceding period.
- The approved bassinet complement increased from 1,623 to 1,625 bassinets. Newborn admissions and separations increased by 1.2% and 1.0%, respectively.
- Newborn total days stay of separations decreased by 1.3%, and the average length of stay decreased to 5.0 days from 5.2 days in the previous year. Newborn patient-days during the year increased by 1.2%. The average daily number of newborns in hospital increased 1.5% from 558.0 to 566.3.
- Total operating expenses for public general hospitals were $1,748.5 million, averaging $524.80 per patient-day and $727.93 per capita.

Auxiliary Hospitals

- Forty-five auxiliary hospitals, provided 4,127 long-term care beds for patients in Alberta. These beds yielded a ratio of 1.7 beds per 1,000 population in the province, a 5.6% drop from 1987-88. This, together with 1,459 long term care beds in general hospitals yielded a ratio of 2.3 beds per 1,000 population.
- Occupancy rates in auxiliary hospitals averaged 97.9% over the fiscal year, up from the 1987-88 average of 97.0%.
- There were 1.1 patient separations per 1,000 population in 1988-89, a 31.3% decrease from 1.6 in the preceding period.
- Patients stayed in auxiliary hospitals, on average, 523.3 days, a 54.0% increase from 339.9 days in 1987-88.
- In auxiliary hospitals, the number of patient-days per 1,000 population decreased by 4.6% to 614.2 days in 1988-89 compared to 643.6 days in 1987-88.
- The number of full-time equivalent employees fell to 4,555.2 from 4,879.6, a decrease of 6.6%.
- Paid hours per patient-day decreased to 6.2, from 6.5 in the preceding fiscal year.
- Total operating expenses of auxiliary hospitals were $183.6 million, averaging 124.48 per patient-day and $76.45 per capita.

Mental Health Hospitals

- The approved bed complement was 1,072, unchanged from the previous period, with a ratio of 0.4 beds per 1,000 population.
- The average percentage occupancy rate in Alberta Hospitals Edmonton and Ponoka was 85.6% compared to 86.2% in the previous year.
- There were 1.1 separations per 1,000 population from the mental health hospitals, a 10% increase from 1.0 in 1987-88
- The average length of patient stay decreased 2.4% between 1987-88 and 1988-89, from 137.8 days to 134.5 days.
- Patient-days per 1,000 population declined 2.2% to 139.4 days.
- Full-time equivalent employees in mental health hospitals rose by 1.3% to 1,961.2.
- Total operating expenses were $85.4 million, averaging $255.13 per patient-day, and $35.57 per capita.

Nursing Homes

- There were 92 nursing homes in Alberta in 1988-89, a net increase of one home, providing care to Alberta seniors. 7,961 beds were available, up 0.6% from 1987-88.
- There were 37.6 nursing home beds per 1,000 population 65 years and over. This ratio declined by 2.8% from 38.7 in 1987-88.
- The average occupancy rate of nursing homes in 1988-89 was 97.4%, compared to 97.1% in the previous period.
- The number of resident-days in nursing homes during the year was 2,830,459, an increase of 0.6% from the preceding fiscal period.
- Total operating expenses for nursing homes were $162.9 million averaging $57.54 per resident-day, and $67.81 per capita ($763.86 per person 65 years of age and over).
- The average cost of providing care at district nursing homes was $64.82 per resident-day, exceeding the cost incurred by private and voluntary nursing homes, which was at $53.84 per resident-day.

SUMMARY OF DISTRIBUTION OF TOTAL OPERATING EXPENDITURE BY TYPE OF EXPENDITURE HOSPITALS AND NURSING HOMES For the Year Ended March 31, 1989

Institution Type and Size	Gross Salaries And Wages	Supplies(1)	Employee Benefits	Total Operating Expenditure(1)	Operating Expenditure Per Patient Day
	$	$	$	$	$
Public General(2)					
1-24 Beds	10,564,214	6,060,870	1,192,983	17,818,067	522.69
25-49	82,758,011	47,935,750	10,254,167	140,947,928	363.22
50-99	147,016,435	81,489,828	17,113,623	245,619,886	430.29
100-299	158,333,141	71,254,829	17,548,574	247,136,544	531.29
300 and over	710,401,471	312,653,275	73,910,446	1,096,965,192	585.48
Total	1,109,073,272	519,394,552	120,019,793	1,748,487,617	524.80
Auxiliary					
1-99 Beds	34,504,829	14,911,924	4,316,858	53,733,611	120.99
100 and over	88,222,288	31,154,503	10,524,192	129,900,983	125.99
Total	122,727,117	46,066,427	14,841,050	183,634,594	124.48
Mental Health Hospitals	59,376,070	18,957,348	7,106,457	85,439,875	255.13
Nursing Homes Private and Voluntary					
1-50 Beds	4,593,492	1,840,635	347,290	6,781,417	57.85

Notes pertaining to this table appear on the following page.

NOTES PERTAINING TO HOSPITAL UTILIZATION SELECTED INDICATORS
For the years ended March 31, 1988 and 1989

NOTES: r: Revised, n.a.: Not applicable

(1) Source: **Annual Return of Health Care Facilities - Hospitals - Part One**, 1987-88 and 1988-89. The information is that reported to the Department by individual hospitals for the years ended March 31, 1988 and March 31, 1989, respectively.

(2) Includes all public and federal general hospitals. Data for La Crete Health Centre were consolidated and reported with the High Level Community Health Centre data. Data for the St. Martin's Health Centre in Desmarais were consolidated with the Slave Lake General Hospital data. Data for Lethbridge and Red Deer Regional Laboratories were consolidated with Lethbridge and Red Deer Regional Hospitals, respectively.

(3) Number of beds and bassinets that the hospitals were approved to accommodate at March 31, 1988 and 1989 as approved by the Department and Federal Government as at January 1, 1988 and August 23, 1989, respectively.

(4) Adults and Children.

(5) Based on Alberta Bureau of Statistics, **Alberta Population Growth, 4th Quarter, 1989** which places Alberta's population at 2,383,800 and 2,417,000 as at April 1, 1988 and 1989, respectively.

(6) Includes residents and non-residents of Alberta separated from Alberta hospitals.

(7) Based on total accumulated patient-days during the reporting year and total approved bed complement as at March 31 of the reporting year.

(8) Based on Alberta Bureau of Statistics, **Alberta Population Growth, 4th Quarter, 1989** which places Alberta's population at 2,370,300 and 2,402,000 as at October 1, 1987 and 1988, respectively.

(9) Excludes medical staff, interns and residents.

(10) Total paid hours divided by the normal paid hours of one full-time employee (2,022.75 hours).

(11) Does not include federal hospitals.

SELECTED NURSING HOME UTILIZATION INDICATORS
For the Years Ended March 31[1]

	1987	1988	1989	Percentage Change	
				1988/87	1989/88
Number of Facilities as at March 31	88	91	92	3.4%	1.1%
Approved Bed Complement as at March 31[2]	7,868	7,914	7,961	0.6%	0.6%
Approved Bed Complement per 1000 Population 65 Years and Older[2,3]	39.8r	38.7r	37.6	-2.8%	-2.8%
Average Percentage Occupancy[2,4]	97.6	97.1	97.4	n.a.	n.a.
Admissions	3,230	3,307	3,222	2.4%	-2.6%

GENERAL NOTES

The statistics presented in this publication are compiled from information submitted to Alberta Health by each general hospital, auxiliary hospital and nursing home.

Hospital operation and financial data, shown in Tables 1 to 15, are derived from the **Annual Return of Health Care Facilities - Hospitals - Part One and Two** for the year ended March 31, 1989. The exceptions to this are columns 7 and 8 of Table 1, which are based on the D.M.O. Schedule of Rated Bed Capacities For Approved Hospitals, Effective April 1, 1989.

The financial data presented in Tables 10 to 15 are compiled and reported on an accrual basis. Tables 10 to 15 contain audited operating expense data as certified and reported by the external auditor of the hospital. When interpreting the above data, reference should be made to the Glossary which contains selected definitions of terms used in the Annual Return.

Hospital morbidity data, shown in tables 16 to 23, are derived from the **Hospital Morbidity Files** for the fiscal year 1988-89.

Nursing home operation and resident data, shown in Tables 24 and 25, are derived from the **Annual Return of Nursing Homes** for the fiscal year 1988-89. The exception to this is column 1 of Table 24 which is obtained from a listing provided by Long Term Care Branch, based on nursing home contracts.

The statistical tables which follow provide detailed information on the operation and utilization of hospitals and nursing homes. In these tables, the facilities have been arranged in ascending order of approved bed complement within each facility group. An alphabetical listing for each type of facility can be found at the end of the supplement.

Note: All rates shown in the following tables have been rounded to one or two decimal places.

NOTES:
(1) Approved bed complement for public and federal general hospitals is the number of beds approved for the hospital as at March 31, 1989, by the department and the federal government, respectively.
(2) Beds staffed and in operation is the number of beds as at March 31, 1989, that are actually available for patient accommodation, with staff available to provide the required level and type of care, whether or not actually occupied by a patient at that time.

TABLE 6 - APPROVED BED COMPLEMENT, BEDS STAFFED AND IN OPERATION, AVERAGE PERCENTAGE OCCUPANCY, MOVEMENT OF PATIENTS, TOTAL DAYS STAY AND AVERAGE LENGTH OF STAY

AUXILIARY HOSPITALS

(Continued)

Notes:
(1) Approved bed complement is the number of beds approved for the hospital, as at March 31, 1989, by the Department.

(2) Beds staffed and in operation is the number of beds, as at March 31, 1989, that are actually available for patient accommodation, with staff available to provide the required level and type of care, whether of not actually occupied by a patient at that time.

(3) Based on approved bed complement as at March 31, 1989.

(4) A separation is the discharge or death of an in-patient.

(5) Total days stay since admission of patients separated during the year.

(6) Average number of days stay of patients who were separated during the year.

NOTES:

(1) Approved bed complement is the number of beds approved for the hospital, as at March 31, 1989, by the department.

(2) Beds staffed and in operation is the number of beds as at March 31, 1989, that are actually available for patient accommodation, with staff available to provide the required level and type of care, whether or not actually occupied by a patient at that time.

(3) Based on approved bed complement as at March 31, 1989.

(4) A separation is the discharge or death of an in-patient.

(5) Total days stay since admission of patients separated during the year.

(6) Average number of days stay of patients who were separated during the year.

(7) Excludes medical staff, interns, residents and all students.

(8) Excludes medical staff, clinical clerks, interns, residents and students.

(9) Excludes medical staff, clinical clerks, interns and residents.

(10) Excludes medical staff, clinical clerks, interns, residents, students and support staff of chief of medical staff and heads of services.

TABLE 16 - PRIMARY DIAGNOSIS BY CANADIAN DIAGNOSTIC CODE (CDC) (1)
OF ADULTS AND CHILDREN SEPARATED FROM ALL HOSPITALS (2), (3)
(continued)

Notes:

(1) Canadian Diagnostic Codes (CDC) have been used for the purpose of aggregating the diagnostic categories. Conversion to ICD-9-CM codes are available upon request.

(2) Source: Alberta Health Morbidity Files, 1988/89. Includes both residents and non-residents of Alberta who were separated from general hospitals in Alberta, as well as Alberta residents who were separated from the Lloydminster hospital in Saskatchewan. Excludes Alberta residents who were hospitalized in other general hospitals outside the province.

(3) A separation is the discharge or death of an in-patient.

(4) Primary diagnosis is the condition established, after study, to be chiefly responsible for occasioning the admission of the patient to the hospital for care.

(5) Codes 192-207 are separations due to trauma, i.e., accidents, poisonings and other external causes. Because separations due to trauma are reported in terms of primary diagnosis by type of injury, these are distributed among codes 001 to 191. The trauma code separations can be identified by retrieving separations by E-codes. However, to avoid double counting, this has not been done on this table.

Notes:

(1) Source: Alberta Health Morbidity Files, 1988/89. Includes both residents and non-residents of Alberta who were separated from general hospitals in Alberta, as well as Alberta residents who were separated from the Lloydminster hospital in Saskatchewan. Excludes Alberta residents who were hospitalized in other general hospitals outside the province.

(2) A separation is the discharge or death of an in-patient.

(3) Primary diagnosis is the condition established, after study, to be chiefly responsible for occasioning the admission of the patient to the hospital for care.

(4) Canadian Diagnostic Codes (CDC) have been used for the purpose of aggregating the diagnostic categories. Conversion to ICD-9-CM codes are available upon request.

Notes:

(1) Source: Alberta Health Morbidity Files 1988/89. Includes both residents and non-residents of Alberta who were separated from active care, mental health, and auxiliary hospitals in Alberta, as well as Alberta residents who were separated from the Lloydminster Hospital in Saskatchewan. Excludes Alberta residents who were hospitalized in other hospitals outside the province.

(2) A separation is the discharge or death of an in-patient.

(3) Primary operation is the most important operative procedure, regardless of whether it was the first procedure done. The most important operation is the one that involves the greatest surgical risk to the patient. Non-surgical procedures included (eg., diagnostic radiology), are those performed for diagnostic or therapeutic purposes.

Notes:

(1) Approved bed complement is the number of beds approved for the nursing home, as at March 31, 1989 by the Department.

(2) Beds in service is the number of beds, as at March 31, 1989, that are actually set up and available for the resident accommodation.

(3) Based on approved bed complement as at March 31, 1989.

(4) Includes nursing home residents who died, after admission and before discharge, in the nursing home, or while on leave of absence from the nursing home.

(5) A separation is the discharge or death of a resident.

HEALTH
MARCH 1989
GENERAL HOSPITAL DISTRICT
GENERAL HOSPITAL
AMBULATORY CARE FACILITY (AC)
FEDERAL NURSING STATION (FN)
Multiple facilities are indicated (2)

Adults and Children:
All in-patients, except newborn.

Ambulatory Care:
A facility specifically designed, staffed and equipped to provide diagnostic and therapeutic services to out-patients.

Approved Bassinet Complement:
(For Public and Federal General Hospitals) The number of bassinets approved for the hospital by the Department of Health and the Federal Government, respectively.

Approved Bed Complement:
(For Public and Federal General Hospitals) The number of beds approved for the hospital by the Department of Health and the Federal Government, respectively.

Auxiliary Hospital:
A hospital designed and operated for persons who require elements of hospital care at a less intensive level than are provided in general hospitals. The patients are usually chronically ill or disabled. For some, treatment consists of rehabilitation to a point that return to the community or transfer to a nursing home or other residential facility is possible. For others, treatment is the provision of necessary skilled nursing and medical care for an extended period of time, even though there is little prospect of rehabilitation.

Average Daily Number of Patients:
The average number of in-patients during any given period of time. It is calculated by dividing the number of patient-days during the period, by the number of days in the period.

Average Length of Stay:
The average number of days stay of in-patients who were separated from the facility during the reporting year. It is calculated by dividing the total days stay by the number of separations during the reporting year.

Average Percentage Occupancy:
The ratio of actual days of care to the maximum days of care for the reporting year, expressed as a percentage. It is computed by dividing the total patient-days during the reporting year by the total bed days in the same year (approved complement at March 31 of the reporting year times the number of days in the year) and multiplying by 100.

Bassinets Staffed and In Operation:
The number of bassinets that are actually available for patient accommodation, with staff available to provide the required level and type of care, whether or not actually occupied by a patient at that time.

Beds Staffed and In Operation:
The number of beds that are actually available for patient accommodation, with staff available to provide the required level and type of care, whether or not actually occupied by a patient at that time.

Death:
The cessation of life of an in-patient after admission and before discharge. This category excludes stillbirths.

Discharge:
The official departure from the hospital or from a provincially-recognized unit of the hospital of a live in-patient.

Federal Hospital:
A hospital owned and/or operated by a department or agency of the Government of Canada and operated on a non-profit basis. Operation will generally be by one of the following agencies: Veterans' Affairs, Health and Welfare Canada, National Defence, and/or Atomic Energy of Canada.

Full-Time Equivalent Employee:
One full-time equivalent employee is equal to total accumulated paid hours divided by normal hours of one full-time employee (2,022.75 hours).

General Hospital:
Provides primarily for the diagnosis and short-term treatment of patients for a wide range of diseases or injuries.

In Hospital at Beginning of the Year:
Is the count of all in-patients who were assigned a hospital bed or bassinet as at 12:01 a.m. on the first day of the reporting year. Includes any in-patient who was temporarily visiting out of hospital on this date, but who had not been discharged.

In Hospital at End of the Year:
Is the count of all in-patients registered in the hospital at 12:00 p.m. on the last day of the reporting year and includes patients temporarily out of hospital but who have not been discharged.

In-Patient:
Is a person who has been admitted to a hospital for medical and hospital services and who has been assigned an in-patient bed, or bassinet. This category excludes stillbirths, as well as patients attending a day or night care unit.

In-Patient Admission:
Is the official acceptance into a hospital of a patient (including an infant born alive in the hospital) who requires medical and hospital services including room and board. Reception involves the allocation of a hospital bed, bassinet or an incubator to the patient. A person is counted as an admission each time he is formally admitted to the hospital or to a provincially-recognized unit within the hospital.

Laboratory:
The unit specifically designed, staffed and equipped for performing laboratory investigative procedures through detailed analysis, assay and examination of specimens. This may include microbiology, haematology, histopathology (including autopsy), cytopathology, blood bank and morgue. Electrocardiography and electroencephalography, medical illustration and nuclear medicine are also sometimes part of the laboratory.

Long-Term Unit:
An in-patient unit provided for patients who, at the time of admission, require regular medical assessment, treatment services and continuing nursing care.

Morbidity
The extent of illness, injury, or disability in a defined population. It is usually expressed in general or specific rates of incidence or prevalence; in the context of this report, the term refers to hospital in-patient data classified by diagnostic or procedural codes.

Newborn:
An infant born alive in the hospital, or admitted when the mother was admitted for maternity service, is defined as a newborn for the period of his continuous stay in the hospital. (Transfer within the hospital from the newborn nursery is not considered a separation).

Newborn Admission:
Admission of a newborn is deemed to occur at the time of birth or subsequently at the time of admission of the mother for maternity services.

Newborn Death:
The death of a newborn admission in hospital on or before the seventh day of stay.

Nursing Home:
Provides supervised, personal care for persons who are not ill enough to require hospitalization in a general or auxiliary hospital, but require assistance in coping with activities of daily living.

Obstetrical Suite:
The unit specifically designed, staffed and equipped for the observation, preparation, care and delivery of parturient women. Includes delivery room(s) and labour room(s) of the hospital, but excludes the nursery.

Patient-Day:
The period of service to an in-patient between the census-taking hours on two successive days; the day of admission is counted as a patient-day, but the day of separation is not. When the patient is admitted and separated on the same day, one patient-day is counted.

Patient-Days During the Year:
The total volume of in-patient care, expressed in patient-days, of the facility during the reporting year.

Postnatal Newborn Admission:
A count of infants born outside the hospital and who were admitted to the hospital, their mothers having been admitted for maternity services.

Primary Diagnosis
The conditions established, after study, to be chiefly responsible for occasioning the admission of the patient to the hospital for care.

Public Hospital:
A hospital recognized by the province as a "public hospital". Such a hospital generally is not operated for profit.

Separation:
Is the discharge or death of an in-patient.

Short-Term Unit:
An in-patient unit provided for patients who, at the time of admission, require diagnostic and therapeutic services and/or skilled nursing care and medical attention.

Total Accumulated Paid Hours:
Are reported separately for each department including those for all full-time, part-time and casual employees excluding medical staff of the hospital who, during the year, have had salaries or wages payable to them by the hospital. Hours covering paid holiday time and other paid leave are included for all categories of personnel.

Total Days Stay:
The accumulated patient-days since admission, of patients separated during the reporting year, even if admitted in a previous year.

Total Operating Expenditure:
The cost that accrues during the year for the purpose of operation and maintenance of the hospital, whether or not actually paid during the year, as reported by the external auditor of the hospital. Total operating expenditure includes:

- gross salaries and wages earned by all hospital staff, including all types of hospital remuneration earned by paid medical staff (i.e., salaries, wages, fees, contract rates,honorariums, etc.); gross salaries and wages earned by interns, residents and students enrolled in organized educational programs, as well as by those affiliated or sponsored to take a course elsewhere; and gross salaries and wages earned by all other staff, including non-medical teaching staff and regular employees involved in extra-mural or on-the-job training. Gross salaries and wages also include the value of the donated services of regular staff members who are not paid the full scale of salaries.
- employee benefits.
- supplies and other expenses, including purchased services and other supplies and expenses (excluding medical and surgical supplies and drugs). Other supplies and expenses also include depreciation, interest expense on short-term and long-term loans and ancillary operation expenses.
- medical and surgical supplies.
- drugs.

Total Under Care During the Year:
Includes in-patients in hospital at the beginning of the year plus all in-patient admissions during the year.
